SUMMARY

Publication-focused designer and AI-assisted workflow builder specializing in strategic reports, civic publication systems, data visualization, and interactive review work. Creates clear, stakeholder-ready publications and web-based review experiences that make complex public information easier to understand, evaluate, and approve.

FOCUS AREAS

Publication Design

Editorial layout, report systems, page hierarchy, cover concepts, visual consistency, and stakeholder-ready presentation assets

Civic / Publication Systems

Public-sector publication modernization, reusable design systems, accessibility-aware communication, and review-ready document workflows

AI-Assisted Workflows

AI-supported drafting, organization, quality checks, repeatable production tasks, content refinement, and faster review cycles

Strategic Reports

Long-form reports, executive-readable narratives, budget and research communication, structured findings, and visual storytelling

Data Visualization & Interactive Review

Charts, infographics, visual summaries, web-based review flows, selection persistence, and exportable decision records

Portfolio Delivery

Responsive publication portfolio pages, downloadable report assets, clickable references, and clear project documentation

SELECTED PUBLICATION / DESIGN WORK

City of Plano Budget & Research Publication Modernization — [Interactive Review App](#)

- Supported modernization of a public-facing budget and research publication system through publication design, structured review, and stakeholder-ready visual communication.
- Built a production design system for a 444-page civic publication, including reusable layouts, cover directions, chart components, iconography, and accessibility-aware information design.
- Designed and shipped a mobile-responsive interactive review app for stakeholder selection, saved preferences, and exportable design-decision records.
- Used AI-assisted drafting, organization, and quality-check workflows to improve consistency, speed, and review clarity across a large publication process.

Publication Portfolio — Public-Facing Report & Visual Communication System

- Curated publication work into a responsive portfolio experience with downloadable reports, visual previews, and structured project storytelling.
- Focused on clarity, hierarchy, and executive readability for strategic forecasts, civic reports, CIP materials, data visuals, dashboards, and stakeholder-facing communication.
- Maintained clickable references and public-facing project links so viewers can move from résumé summary to supporting publication examples.

PUBLICATION CAPABILITIES

Publication design · Strategic report layout · Civic/publication systems · Data visualization · Infographic direction · Executive-readable summaries · Interactive review workflows · Stakeholder review support · AI-assisted drafting, organization, and quality checks · Responsive portfolio presentation · Clickable PDF and web references
